Education

University of Ghana, Dec 2020 - Present

BSc in Information Technology

Professional Experience

Xcelsz

Web Developer(Intern), April 2022 - February 2023

- Developed MVP sites for the company to explain to customers about the product.
- Tested sites developed by my teammates to ensure it was responsive, had fast loading time and were SEO-friendly.

Languages

JavaScript; HTML5; CSS;

Some experience in Java, C++, and Python.

Technologies

Sass, Git, Bootstrap, ReactJS, Visual Studio Code, Tailwind CSS, PyCharm, Canva

Personal Projects

Morstist (Feb 2022)

- Used EJS, Bootstrap, CSS and NodeJS/Express to create a site that converts text to Morse Code.

Blog Website (Jan 2022)

- Made with NodeJS/ Express and EJS. Used Mongoose for database management.

Recipe App (Dec 2021)

- This website was created using HTML5, SASS and JavaScript with the help of TheMealDB API.
- The website has a favourite feature that stores selected meals the user likes in the browser's local storage.

Portfolio Website (Nov 2021 - Dec 2021)

- Using HTML5, CSS, JavaScript and Bootstrap, I created a personal website to showcase my projects and social links.
- Improved SEO and Best Practices ranking to 100% on Google's Lighthouse tool

Honours and Awards

- Participated in Hacktoberfest by improving repositories through editing and correcting errors in them.
